

OPTIMUM

Restyling

ABOUT US

Fazi was founded in 1991 and today is one of the biggest manufacturers of electronic roulettes in the world.

During this period we have greatly improved all departments, never stopping our growth and modernization over the years. Constant demands for more sophisticated machines from our clients and users, as well as new trends on the market, made continuous improvement the main vision of the future of our company.

Our vision is to confirm presence and trust of our clients worldwide.

PLAY WITH STYLE

ABOUT ROULETTE

To create the astonishingly small floor footprint of Optimum Restyling Roulette, we started redesigning the concept of electronic roulette by fusing the roulette wheel, play positions and electronic components into a single layer of design.

The compact form enables the fantastic viewing angle of the wheel and the ergonomic playing positions make players feel closer to the game than ever before.

It is one powerful machine where hardware and software function in perfect unison, creating a new generation of electronic roulette that is better by any measure.
