

**MEGA
PAY
ROULETTE**

f a z i

“MEGA PAY” is a new feature of the roulette game and allows the player a choice of alternative attractive payouts, and thus the possibility of larger winnings by hitting a full number. Potentially winning numbers with coefficients are randomly selected and displayed on the roulette immediately after the “No more bets” announcement.

There will be three types of payouts that the player will be able to choose from:

- Standard Roulette x36
- "Up to x75" payout with coefficients x30, x55, x65, x75 on full number
- "Up to x500" payout with coefficients x30, x50, x150, x250, x500 on full number.

Potentially winning numbers with higher payment coefficients are randomly selected in every spin.

The number of selected numbers and their winning coefficient varies in every game:

For the game Mega Pay "Up to x75" between 6 and 10 numbers with coefficient will be displayed,

and for the game Mega Pay "Up to x500" between 2 and 5 numbers per spin.
